

Collaborate Without Boundaries.

Connect Teams, Customers, and Expertise in Real Time.

A unified collaboration platform designed for modern enterprises — enabling seamless communication, problem-solving, and engagement across distributed teams and customers.

Modern enterprises operate across locations, time zones, and digital channels. Yet collaboration often remains fragmented — slowing decisions, reducing efficiency, and impacting customer experience.

Tetherfi Team Collaboration enables *real-time, high-touch collaboration* between employees, partners, and customers — *all within a secure, integrated environment.*

From internal teamwork to customer engagement, organizations can connect, communicate, and resolve issues faster — *without switching platforms.*

KEY BENEFITS

-  **Accelerate Decision-Making**
Bring the right people together instantly to solve problems faster.
-  **Enhance Customer Engagement**
Collaborate directly with customers in real time across digital channels.
-  **Ensure Secure Collaboration**
Maintain enterprise-grade security and compliance across all interactions.
-  **Enable Distributed Work**
Support remote and hybrid teams with a unified collaboration environment.

INDUSTRY USE CASES

Relationship Management

Enable relationship managers to collaborate with customers and internal experts in real time.

Priority Banking & Wealth Management

Deliver secure virtual advisory sessions with collaborative document review.

Remote Technical Support

Provide live troubleshooting with screen sharing and guided assistance.

Internal Team Collaboration

Support distributed teams with seamless communication and project coordination.

Sales & Solution Collaboration

Bring cross-functional teams together to design and deliver customer solutions faster.

From Fragmented Tools → To Unified Collaboration

*One Platform.
Complete Collaboration.*

KEY FEATURES

-  **Real-Time Communication**
Voice, video, and messaging in one platform — enabling instant collaboration across teams and customers.
-  **Interactive Collaboration Tools**
Screen sharing and co-browsing allow teams to guide, demonstrate, and troubleshoot in real time.
-  **File & Content Sharing**
Exchange documents instantly to support faster decisions and coordinated workflows.
-  **eSignature & Digital Approvals**
Simplify document workflows with secure, real-time approvals.
-  **Secure Enterprise Infrastructure**
Enterprise-grade security with flexible deployment (cloud, on-premise, hybrid).
-  **Ideation & Brainstorming**
Collaborate visually through shared workspaces and digital ideation tools.

Tetherfi is a leading provider of **AI enabled enterprise communication platforms**, enabling seamless omnichannel customer engagement across chat, audio, video, screen sharing, co-browsing, and file sharing — **anytime, anywhere, on any device**.

Powered by advanced AI, including **Vision AI** and **Speech AI on the Edge**, Tetherfi transforms both customer and agent experiences through intelligent automation, contextual understanding, and real-time assistance across communication channels. Our **unified, Edge AI enabled**, single-window interface streamlines interactions, allowing enterprises to resolve customer queries faster and more effectively **across all digital touchpoints**.
